EDUCATION

Bangladesh University Of Business And Teacnology (BUBT)
Mirpur 02, Dhaka
B.Sc. in Computer Science and Engineering (CSE)
June 2017 – August 2021
CGPA-3.83

EXPERIENCE

Exabyting
Oct 01, 2023 - Aug 31, 2025
Software Engineer (Frontend)
Dhaka-1212, Bangladesh

- Built responsive features for **bKash website** using **React.js, Laravel, and Next.js,** including **bKash Map, Education Fee Payment**, and **History**, enhancing UX and accessibility.
- Developed **Flow Builder** for **Sogedes' ai.fctry** with **React.js** and **Tailwind CSS**, enabling drag-and-drop AI workflows.
- Created **Onboarding Analytics** and **Onboarding Settings** for **Empatick** using **Next.js, CSS Modules, and Bootstrap**, streamlining employee onboarding.
- Optimized performance and fixed bugs across **bKash Toll** web app and CMS.

Prolific Info Tech
Dec 01, 2021 - 06 June, 2023
Jr. Software Engineer (Frontend)
Dhaka-1212, Bangladesh

- Developed responsive web apps with **React.js**, **Vue.js**, and **Next.js**, ensuring quality delivery.
- At **QuestionPro** , built **TypeScript**-based CX components, tested with **Jest** and **React Testing Library**.
- Worked with cross-functional teams for timely project launches.

PROJECTS

bKash Website   *Laravel, React.js, TypeScript, React Quary, React Signal, React Leaflet, Bootstrap, Git*   Preview

- **bKash Website** is the online portal for **bKash**, Bangladesh's leading mobile financial service, offering money transfers, bill payments, and merchant transactions to over **70 million users**.
- Enhanced **bKash Map** (agent, merchant, customer care and atm booth locator), **Education Fee Payment** (for 1,000+ institutions), and **History sections**, improving navigation and transaction ease. Upgraded **bKash Toll** web app and CMS, refining UI and resolving bugs.

Sogedes – Flow Builder   *React.js, React Flow, Tailwind CSS, Git*   Preview

- **Sogedes' ai.fctry** is a conversational AI platform by a German CX tech company, enabling scalable **chatbots** and **voicebots** for customer service automation.
- Built a drag-and-drop **Flow Builder**, powering real-time AI conversation design for customizable workflows.

Empatick   *Next.js, CSS Modules and Bootstrap, Git*   Preview

- **Empatick** is an employee engagement platform using **SMS** to connect deskless workforces, with onboarding features for new hires' first **90 days**.
- Developed **Onboarding Analytics** with dynamic dashboards (emotion/responsiveness charts), **Settings** UI with toggles and FAQ uploads, and **Employee Table** with **CSV bulk uploads**, boosting HR efficiency and engagement tracking.

QuestionPro   *React.js, TypeScript, React Quary, Jest, Git*   Preview

- It is a response-based **ticketing system**. Improves products and services. It collects customer feedback through surveys. This system is designed to help a user to manage **automatic tickets** and **manual tickets** in one convenient place.
- Designed reusable **ticketing components**, streamlining issue resolution. Tested features with **Jest**, ensuring robust survey-to-ticket workflows.

CasaBeauMonde   *Nuxt.js, Capacitor js, Quasar, Git*   Preview

- **CasaBeauMonde** is a multi-vendor e-commerce platform dedicated to selling women's clothing-related products through its website, focusing on a modern shopping experience.
- Designed and developed a clean, responsive storefront using **Nuxt.js** and **Quasar**, converting from **Bootstrap** to optimize speed and ensure compatibility across devices.

ShipSimple   *next.js, Flowbite, Redux Toolkit, Git*   Preview

- It is a Courier based shipping solution application.
- Developed and converted pages to **Flowbite** website using **Next.js**.
- Utilized **responsive design** to ensure compatibility across all devices.
- Fixed bugs and issues in the frontend to ensure smooth operation of the applications.

Biziary   *React.js, Chakra UI, Redux, Git*   Preview

- Biziary is a global business directory for searching, reviewing, and listing businesses across major cities, connecting users to local services.
- Developed **admin** and **user panels**, enabling efficient listing and search functionality with a clean, responsive UI using **React.js** with **Chakra UI** as UI library .

The Loge   *Angular.js, Tailwind CSS, PrimeNG, Leaflet, Git*   Preview

- Developed the frontend of a golf booking and management platform for golfers and golf courses useing **Angular**.
- Implemented interactive maps with **Leaflet** to show golf courses, nearby hotels, distances, and locations.
- Built booking interfaces for users to check available slots, tee times, and make reservations.
- Created reusable UI components with **PrimeNG** and **Tailwind CSS** for responsive and consistent layouts.
- Integrated APIs to display course details, availability, and hotel information dynamically.
